HAVE YOU SWITCHED PHONE SERVICE?

Your alarm system communicates through a landline and for some, also through Cellular networks. An alarm system has no difficulty transmitting through a traditional landline when the line is not shared with other data. For example, DSL internet service is shared through the phone line, therefore your alarm system is continuously interrupted by data transmission, regardless of whether the internet is in use.

To ensure your alarm monitoring is uninterrupted, a digital line filter should be installed if your phone system is through your cable service or you have DSL internet on your phone. If you are unsure of your phone or internet service please contact our us and we will help determine if you need a filter.

Your alarm system will work in most cases, however, if internet phone jacks are used your system may be unable to communicate with our Central Station.

ALARMING NEWS!

We are proud to announce that Advanced Security Systems, Superior Alarms Inc., Custom Security and Sound, and Clover Alarm are now operating as one. Our combination unites market leaders and uniquely positions us to provide the most comprehensive set of security solutions to our region.

What does this mean for you, our customer?

- 24-hour “On Call” technicians
- Locally owned and operated dedicated Central Monitoring Station with state-of-the-art equipment and services
- Factory trained and certified technicians
- Remote programming and troubleshooting of your system
- Leading industry technology

Our goal is to continue to deliver high-quality products and services you have come to expect. We expect 2012 to be just as exciting as 2011 as we prepare to announce additional services and solutions.

Thank you for your continued support through this transition. All of us at Advanced Security Systems look forward to serving you.

SAFETY FIRST....

IF I WERE A THEIF

If I were a thief I would check your doors and windows to find one unlocked, as I don't want to make a lot of noise. My favorite is when you forget to close your garage door.

I will even walk through your front door during the day when you are not home. I actually prefer it. I know you are not home because your porch light is on, no cars are in the driveway and I don't hear any noise in

the house. Remember to lock your deadbolt because I can jimmy any lock. If I were a thief I would lay low in the shrubs or bushes and watch. Motion lights scare me off and barking dogs annoy me. And those nosey neighbors of yours... can't stand them.

If I were a thief I would go everywhere looking for victims who don't pay attention,

who forget to take precautions, or are careless.

Remember.... I am on FaceBook, Twitter and all the social networks. I know when you leave for vacation....

PROJECT SPOTLIGHT...

PLAZA POINT

The Danco Group of Companies located in Arcata, CA has been filling the affordable housing needs for the Humboldt County area over the past fifteen years by applying for funding, project and construction management and property management once the project is complete. Advanced Security Systems is currently collaborating with The Danco Group by installing a Fire Alarm System, Access Control System, Telephone Entry System as well as Life+Guard Personal Emergency Response Systems at Plaza Point Senior Housing Development located in Arcata, CA.

Plaza Point is a mixed-use development including twenty-nine units for seniors on the second and third floor, while offering commercial space on the first floor. This project will meet the LEED Platinum certification of green building.

Advanced Security has worked with The Danco Group for over twenty years providing *peace of mind* in their new commercial and residential construction projects through the installation of complete Fire and Security Alarm Systems. This project was especially exciting for Advanced Security Systems as Life+Guard, a division of Advanced Security Systems, was able to provide Personal Emergency Response systems in each apartment for the residents. This installation increases the ability for seniors to continue to live independently for a longer period of time as well as meeting the security and access control needs of the building. The comprehensive access control and telephone entry system are state-of-the-art and the Fire Alarm System provides complete protection throughout the facility.

GOING GREEN...

In our efforts to better serve our customers and the environment, Advanced Security Systems is working toward paperless communication. Very soon you will receive our newsletter and other communications electronically. Please take a moment to fill-out the form below and send it in with your payment or email the information to colleen@advancedsecurity.us.
