Raise the Roof

Volunteers have been working to restore parts of the historic Hammond Mill in Samoa, California. The buildings being restored include the historic roundhouse, machine shop, car barn, and boiler shop. On July 28th 2012 the Timber Heritage Association and the Humboldt Builders Exchange teamed up to organize an 'old fashioned barn raising' at the Hammond Mill. They called the event "Neighbors Helping Neighbors – Raise the Roundhouse". There were approximately fifty to sixty volunteers who showed up to perform restoration work on the mill. The largest unified group in attendance, fourteen Advanced

MEET THE LYNX 5100

Advanced Security Systems is excited to announce the newest addition to their line of security products; the Honeywell LYNX Touch 5100. The LYNX Touch 5100 is a self-contained alarm system that features a full color, 4.7 inch touchscreen and supports Z-wave thermostats and lighting controls, giving homeowners greater control over their security and home management systems. LYNX Touch can set or change thermostats or turn off the lights when the system is armed.

LYNX Touch is compatible with our Total Connect Remote Services, a service that allows homeowners to access and manage their security system from a web-enabled device including personal computers, smartphones and tablets. With Total Connect, homeowners can receive important alerts, view live streaming security video, receive video event clips and control their systems remotely.

HOW ARE WE DOING....

How are we doing? To better serve our customers we are asking for your feedback. We love to hear from our customers; it allows us to understand what we are doing well and what we can do better.

What are some of the questions you had after your system was installed? Was it easy to use and was the training offered useful? Many times a new product is demonstrated and with the support of an expert it seems *easy* and *straight forward*. Then when we are

left to use it we are uncertain of its features or the necessary steps to be taken. If you feel this way or need additional training on your system, please call us. We offer free personal training whenever necessary.

The best praise we can receive is a referral to our services. We offer you three months of free monitoring for all referrals to new customers who begin monitoring with Advanced Security Systems. You can send us the contact infor-

mation or ask those whom you refer to us mention your name when new service is provided.

Please contact us at (707)443-6366 or (877)443-6366 with any feedback, questions, or referrals.

Visit our website at www.advancedsecurity.us for the latest news in products, services, and contact information.

(Continued from page 1)

Security Systems employees and family members, volunteered their Saturday to assist in the efforts of reroofing the buildings. Restoring these buildings will give future generations a glimpse into how the timber industry has been an integral part of the Humboldt County economy. Advanced Security Systems was delighted to be a part of such a beneficial occasion.

EMPLOYEE SPOTLIGHT...

BEN DALTON

Meet the newest addition to our team of security professionals at Advanced Security, Ben Dalton. Ben comes to Advanced Security Systems with over ten years of experience in construction management and is leading the newest division of Advanced Security Systems; Life Safety Services.

Ben's vast knowledge of construction and experience in management will provide Advanced Security Systems customers the service and response they have come to expect. The new division of Life Safety Services will allow Advanced Security Systems to serve our customers proactively in order to maintain and stay in compliance with National Fire Protection Association standards and codes for their businesses and buildings.

While not at Advanced Security Systems testing alarm systems Ben spends his time riding horses with his wife as well as working on any project he can find around the house.

ENHANCING YOUR BUILDING... BUILDING REPORTS

Advanced Security Systems has enhanced the services it offers through Building Reports, a service of the newest division of the company, Life Safety Services. Using Building Reports ensures that your building is in compliance with regulatory standards and meets the needs of not only the property owners but the businesses which occupy those buildings.

Building Reports offers online, on-demand reporting of every device within your alarm system. Once scanned, the status of the device, any recalls and the last test of the device is available at the touch of a button. No longer is scrambling for past reports or contacting your service company required to stay in compliance with regulatory agencies. Simply login and view the testing and maintenance history and current status of your alarm system.

For more information on how Building Reports can enhance your building's life safety systems and ensure you are in compliance, contact Ben Dalton today at (707)443-6366.
