THE MOST COMMON ENTRY POINTS FOR A BREAK-IN

34%	23%	22%	9%	6%	2%
<p>Front Door</p> <p>Often times, burglars will simply break-in right through the front door. This is especially true, if the home's door is old. All the intruder has to do is give it a good push or kick. It's best to get a very sturdy door and deadbolt lock.</p>	<p>First Floor Window</p> <p>In under one minute a burglar can slit a screen, pry open a window, and crawl through it. Installing an alarm with window sensors is paramount, plus glass break detectors and security decals.</p>	<p>Back Door</p> <p>Back doors make for a great cover for thieves who don't want to be seen by neighbors or those passing by. Install surveillance cameras to keep watch over your back door. Have security decals and door contacts on every door.</p>	<p>Attached Garage</p> <p>Many homeowners use the garage door as a main entry into their home, which means it's a prime target for intruders. One might forget to keep the garage door shut altogether making for a definite invitation to unwanted guest.</p>	<p>Unlocked Entrances & Storage Areas</p> <p>It is important to take special note of storage areas. Make sure areas such as this and other entrances are locked and have proper lighting.</p>	<p>Second Floor</p> <p>Don't think that a burglar won't gain entry through the second floor window or especially a balcony. Some thieves even utilize rope ladders</p>

TESTING YOUR SYSTEM

Advanced Security Systems encourages you to test your system often to ensure that all points are working properly and Central Station receives the signal. Follow these steps to properly test your system.

1. Call our Central Station monitoring station **(707) 442-0681** to notify the dispatcher you are testing your system. In order to do so you **MUST** provide your account number or password.
2. Then arm your system and open a protected door or window. Allow the siren to sound for at least 30 seconds and insure the central monitoring station receives the proper signal. *During the time you have placed your system in "test" no action will be taken on any signals received.*
3. When complete, contact the central monitoring station and confirm which signals were received and that you are complete testing your system

If you accidentally trip your alarm system, please turn it off immediately. Call our 24 hour central monitoring station and provide your password or account number. This will cancel an unnecessary call to the police or fire department.

Ensure all authorized persons using the alarm system are properly trained on the system.

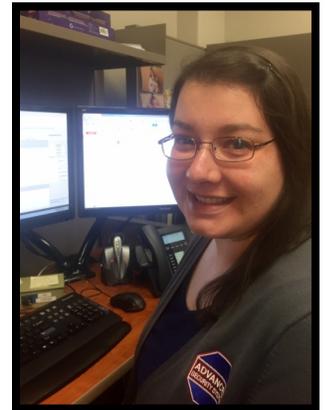

To prevent possible dispatching delays, please notify Advance Security of any changes to your responsible party list or if you are traveling.

EMPLOYEE SPOTLIGHT.....

JESSIE SMITH

Jessie, one of our Service Coordinators, has worked for Advanced for 3 years. Jessie's job entails scheduling service calls, providing customer support, trouble shooting, and programming. "Solving problems and making people happy," is her favorite part of the job. "I love finding solutions to complex problems" says Jessie of her fast paced, never boring job. Jessie grew up in Eureka and is a graduate of Eureka High School. In her free time Jessie enjoys hiking and spending time in the outdoors. She also loves reading all kinds of literature and non fic-

tion. "I am always reading more than one book and I love learning new things." On her days off this summer she plans to be out side in her garden growing flowers! Jessie is a valuable team member at Advanced Security and we appreciate the hard work and dedication she puts into her job.
