**5 Things a Burglar Won't Tell You**

- Burglars will do their best to never look suspicious.
- The two things a burglar hates most are loud dogs and nosy neighbors.
- A burglar will almost never go into a child's room.
- Remove newspapers from your driveway, or a burglar will be able to tell if you are not home.
- A burglar will look for a weak spot to enter your home, (open window, unlocked door, etc.). Always set your alarm when you leave the house.

**PRODUCT HIGHLIGHT...**

**LIFE+GUARD**  
Personal Emergency Response Systems

Formerly VigilONE, Life+Guard extends the offer of the Advanced Security Systems family by providing personal emergency response systems. Monitored by the same local Central Station used to monitor your security system, we are able to provide “peace of mind” to help individuals live independently.

Life Guard offers a wearable help button and console with a powerful 2-way speakerphone. At the press of a button, our

highly trained dispatchers can make immediate contact through the console's speakerphone, evaluate the situation, notify designated emergency contacts, or dispatch emergency personnel in seconds if needed.

Life Guard is easy to use and additional features include a second help button, automatic fall detection, and inactivity monitoring.

The cost of the Life Guard Personal Emer-

gency Response System consists of a one-time activation fee of \$60.00 and monthly fee of \$25.95 per month for 24-hour, local emergency call monitoring.

Please contact us at (707) 445-9911 or [www.life-guard.us](http://www.life-guard.us) for more information.

**EMPLOYEE SPOTLIGHT...**

**JIM SUMMERS**

Jim Summers has been in the alarm industry for over seventeen years and with Advanced Security Systems for the majority of those years. Jim started as a wire puller with Advanced Security Systems and is the General Manager for the Santa Rosa area since 2008.

Relocating to Santa Rosa was a no brainer for Jim and his

newlywed wife Tina. They love the location of Santa Rosa; being close to the ocean, Tahoe, San Francisco and the vast selections of wineries. With their six children, the schools and football programs in the area are great for the kids.

The best part of the job for Jim is the opportunity to see all the new construction and the advancements in

technology since he started. One project that stands out to Jim is the McDonald Mansion in Santa Rosa. He is amazed at the care and attention that has been put into preserving the 17th Century architecture while including modern technology such as the Fire and Security System we have installed.

When out on the football field or at a local winery make sure you say hello to Jim!

## Security Trivia

Before going on a vacation, you should:

- Leave a note on the door saying when you will be back
- Tell a trusted neighbor you are leaving
- Set your alarm system

Answer: C P B

## COMMUNITY INVOLVEMENT...

### RHODODENDRON PARADE

Advanced Security Systems office staff is once again involved in the 46th Annual Rhododendron Parade held in Eureka, California. This year's parade will be held on April 30, 2011 traveling through downtown Eureka and Henderson Center. The staff will assist in the logistics of coordinating such a large community event as well as participating the day of.

The tradition of the Rhododendron Parade has carried through the Humboldt County Community for 46 years, celebrating the local treasure of Rhododendrons. This year appearances will be made by the Anheuser-Busch Clydesdale horses, the Wells Fargo Stagecoach as well as many Humboldt County volunteer and service groups.

Advanced Security Systems believes in tradition and community support and would like to thank all those who will be in attendance and participating this year.

#### MISSION STATEMENT

Advanced Security Systems is committed to provide quality services that ensure "peace of mind" for our northern California and southern Oregon customers. Our consistent growth has been and will continue to be the result of maintaining a team of quality security professionals, insuring a genuine concern for the well-being of our customers.

## PROJECT HIGHLIGHT...

### CUSTOM DESIGN

Recently our installation team completed an amazing job on a home located in northern California overlooking the Pacific Ocean. The custom home was a multi-phase, multi-year project that began with the custom barn. The wood used in the home was milled onsite by the owner and the detail in the home from the rock fire place to the care in all the wood used can be seen throughout.

The project required a large control panel in order to protect both the home and the barn. The most up-to-

date and technologically advanced equipment was used.

A Bosch 7412GV3 Control Panel with two zone expand modules along with three Bosch 1255 Command Centers were installed with numerous motion detectors, door and window contacts, and smoke and heat detectors. Wireless protection was installed, using a Telguard unit allowing for wireless monitoring. With the equipment installed there will never be a lapse in security, as the system is monitored wirelessly and has multiple backup batteries.

The detail and care put into the home by the owner was carried out by Advanced Security Systems installation team, beginning as an intricate part in the design process of the home through the finished product and training on the system.

Advanced Security Systems offered our knowledge of all systems installed and managed the project from its conception, surpassing the needs
